BIObased PLASTIC I'm green

1+ YEARS

LET'S SAVE THE ENVIRONMENT TOGETHER!

BIO BASED
PLASTIC
TOYS

This is a completely new range of eco-toys "I'm green", which means made of bio-plastic.

Bio-plastic is a high-density polyethylene, which is 94% composed of sugar cane, a renewable raw material. For this reason "I'm green" polyethylene captures and fixes CO2 from the atmosphere during its production, helping to reduce greenhouse gases emission. At the same time, bio-plastic toys are not inferior in their properties to toys made of traditional plastic.
